

## SCT Quality Policy

February 27, 2025

At SignalCraft, we create innovative RF/mmWave and high-speed digital products to empower customers in aerospace, defense, and industrial IoT. Our integrated design and manufacturing expertise ensures excellence in everything we do. Our vision is to be the go-to partner for cutting-edge products, recognized globally for helping companies overcome challenges and seize market opportunities.

We strive to:

- Exceed the expectations of our stakeholders, ensuring compliance with all statutory and regulatory requirements
- Refine processes continually to deliver high-quality products
- Uphold our values of respect, transparency, and ethical decision-making

To measure the effectiveness of our Quality Management System (QMS), we establish clear objectives that help us track performance, mitigate risk, and drive continual improvement. SignalCraft leadership ensures our quality policy is communicated, understood, and implemented across the organization. We provide the necessary resources to meet our quality objectives, with every team member responsible for maintaining our high standards.

Co-Founders, Bernard Gobeil and Todd Smiley
